

NORTHERN MICHIGAN UNIVERSITY
CS 326-01-09S
SUMMER 2009
OBJECT ORIENTED DESIGN

3 credits

Independent Study throughout the summer

Instructor: Andy Poe, 1129 New Science Facility, 227-1598

The course covers the object oriented design paradigm of programming, and is required for the Computer Science and Network Computing majors. You will learn how to design objects for efficient use and reuse of code.

We will be learning the Visual C# language to accomplish this.

Text: No Text

Laptop Policy: Although this is a Computer Science course, the use of a laptop in class is forbidden in class and on exams. There will be exceptions to this policy, such as when we install software or when we have lab days. But, in general, if I'm lecturing, no laptops, or any other distracting electronic equipment such as Walkmans, iPods, cell phones, etc.

Courseload: There will be no exams. The assignments will be a series of (sometimes quite challenging) C# or Java programs that exemplify the power of object-oriented design

Office Hours: By appointment.

DISABILITY SERVICES

If you have a need for disability-related accommodations or services, please inform the Coordinator of Disability Services in the Disability Services Office at 2001 C. B. Hedgcock (227-1700; TTY 227-1543). Reasonable and effective accommodations and services will be provided to students if requests are made in a timely manner, with appropriate documentation, in accordance with federal, state and University guidelines.
