

Table of Contents

Chapter 1 A First Java Program

1.1 A First Java Program	1-1
Graphics Commands & Constants	
Mixing Colors	
Exercises	
1.2 Organizing a Program with Private Methods	1-5
Method names	
Exercises	
1.3 The Console Window	1-7
Exercises	

Chapter 2 Repetition

2.1 Repetition — Methods with Parameters	2-1
Parameter types	
The Signature of a Method	
The Console Window	
Concatenation: creating long strings from shorter ones	
Variables – types, declaration & initialization	
Exercises	
2.2 Many Repetitions — Loops	2-5
The while control structure	
Important notes on ‘infinite loops’	
Incrementing Variables	
The Console Window	
Graphical Examples	
Scope and lifetime of a variable	
Exercises	
2.3 Expressions	2-11
True and false expressions	
Arithmetic expressions	
Constants	
2.4 Using <i>while</i> with Parameters	2-12
Exercises	
2.5 Graphics Organization	2-15
centering graphics	
scalable graphics	
2.6 Additional Loop Control Structures	2-17
The for structure	
The do...while structure	

Tech Note 2.5 Running Interactive Programs

Recommended Startup Code	2.5-1
---------------------------------------	--------------

Table of Contents

Chapter 3 Interaction

3.1 User Interaction & Data Manipulation.....	3–1
State Variables and Painting Methods	
A Program using the Mouse	
The repaint method	
Public and Private Methods	
A General Form for an Interactive Program	
A Program using Mouse & Keyboard	
State Variables & Method Variables	
3.2 The Conditional Control Structure <i>if</i>.....	3–6
Similarity between <i>if</i> and <i>while</i>	
A Sample program using <i>if</i>	
3.3 Mouse Events.....	3–7
3.4 More Notes on Expressions.....	3–8
Longer expressions, using <i>and</i> and <i>or</i>	
Comparing Strings and Colors	
3.5 Variables and Initialization.....	3–9
Identifiers	
Declaring Variables	
Initializing Variables	
Scope of a Variable	
3.6 Key Events.....	3–11
3.7 Buttons.....	3–14
3.8 Better Structure with Smaller Methods and Functions.....	3–17
Selection using a Boolean Function	
The Console Window (a reminder)	
Exercises	
3.9 The <i>TextField</i> Class: Entry of Multi-Character Data.....	3–19
A Program using a <i>TextField</i>	
Obtaining Numeric Values from a <i>TextField</i>	
An example using numbers obtained from a <i>TextField</i>	
Exercises	
Using <i>keyPressed</i> in a Program with <i>TextFields</i>	
Obtaining the Source of a Key Press	
3.10 Anatomy of a Class.....	3–24
Origin of Terms	
Program Organization	
Capitalization	
Types of Variables	
3.11 An Alternate Conditional Control Structure.....	3–26
The <i>switch</i> Structure	

Table of Contents

Chapter 4 Objects

4.1 Object Oriented Programming.....	4-1
Introductory Example	
A Program with a Single Object	
A Program with Three Objects	
Java Language instructions to describe a Controller	
Java Language instructions to describe a Star	
An Alternate Conceptual Overview of the Introductory Example	
Classes from without – the Public Interface of a class	
Additional methods	
<i>toString</i> methods	
Program organization – the Controller	
Exercises	
4.2 Button Class Example.....	4-8
The class describing the Controller	
The class describing a Button	
Conceptual Overview of the Button Example	
Exercises	
4.3 Selecting Objects.....	4-13
Exercises	
4.4 Chapter 4 Review	
Signatures - the first line of a method	
Anatomy of a Class	

Chapter 5 Objects containing Objects

5.1 Further Organization of the Stars Program.....	5-1
The class StarProg	
The class StarManager	
Exercises	
5.2 Feedback from Methods I – Avoiding Unnecessary Drawing.....	5-4
Exercises	
5.3 A Deeply Nested Example - a House	5-6
Program Structure	
Exercises	
5.4 Feedback from Methods II – Retrieving Information from Nested Objects....	5-9
Exercises	

Table of Contents

Chapter 6

Arrays

6.1 Many Objects of the Same Type	6-1
6.2 A Program Example with an Array	6-2
The StarManager class with a loop	
Changes to the Star class and the Controller:	
Exercises	
6.3 Variable Length Lists	6-4
Exercises	
6.4 A ‘Draw’ Program	6-6
Placing Stars where the Mouse is Pressed	
Using the Mouse to Create and Select	
A Color Button Class	
Exercises	
6.5 Names Without Associated Objects – the Keyword <i>null</i>	6-11
Variables to which we assign no values	
Scalar Variables to which we assign no values	
Object References to which we assign no values	
Runtime errors from attempts to use a null object reference	
6.6 Lists of Names (or ...)	6-13
Exercises	
6.7 A List with both Names and Numbers	6-15
Exercises	
6.8 Rearranging Items in a List	6-18
Example 1, rollUp	
Example 2, reverse	
Exercises	
6.9 Choosing Items in a List	6-19
Selecting with the Mouse	
Exercises	
6.10 Comparing Objects and their Contents	6-22
6.11 A Method to Select the (Alphabetically) First Name in a List	6-22
Exercises	

Table of Contents

Chapter 6	Arrays	continued
6.12 Sorting a List		6-23
Putting one element in the right place		
Putting every element in the right place		
Maintaining a Sorted List		
Exercises		
6.13 Reordering and Removing Objects in the ‘Draw’ Program		6-25
Reversing the order		
Limiting Selections to One Object at a Time		
Exercises		
6.14 Optional Exercise – Moving Objects in the ‘Draw’ Program		6-27
Moving Selected Objects Around		
Using the Methods <code>mouseDragged</code> and <code>mouseReleased</code>		
Avoiding Surprises while Dragging		
Chapter 7	Files	
7.1 Text Files & Binary Files		7-1
Applets, Applications & Security		
7.2 Text Files		7-1
Creating a Text File		
Reading a Text File		
Exercises		
7.3 Object Files		7-5
Creating and Reading an Object file		
Exercises		
7.4 File Dialogs		7-7

Table of Contents

Appendix A Startup Files

Applets and Applications	A-1
Applets, Applications & Security	
Startup Files	
Starting ‘Static’ Programs — Chapters 1-2	A-1
Starting as an Applet	
Starting as an Application	
Application Starter Program — <i>PanelApplication</i>	
Starting ‘Dynamic’ Programs — Chapters 3 and Up	A-3
Starting up a program that responds to mouse and keyboard	
Starting as an Applet	
Starting as an Application	
Applet Starter Program — <i>PanelApplet</i>	
Mouse and Keyboard Event Director — <i>EventPanel</i>	

Appendix B The Utility Class: BL

Methods	B-1
<i>drawStringLeft drawStringCenter fixedString</i>	
Source	B-1

Appendix C Control Structures

Control Structures	C-1
The <i>if</i> structure	
The <i>while</i> structure	
The <i>for</i> structure	
The <i>do...while</i> structure	
The <i>switch</i> structure	

Appendix D Characters & Strings

Characters	D-1
Strings	D-2
Partial List of String Methods	

Index
